Quiz 11

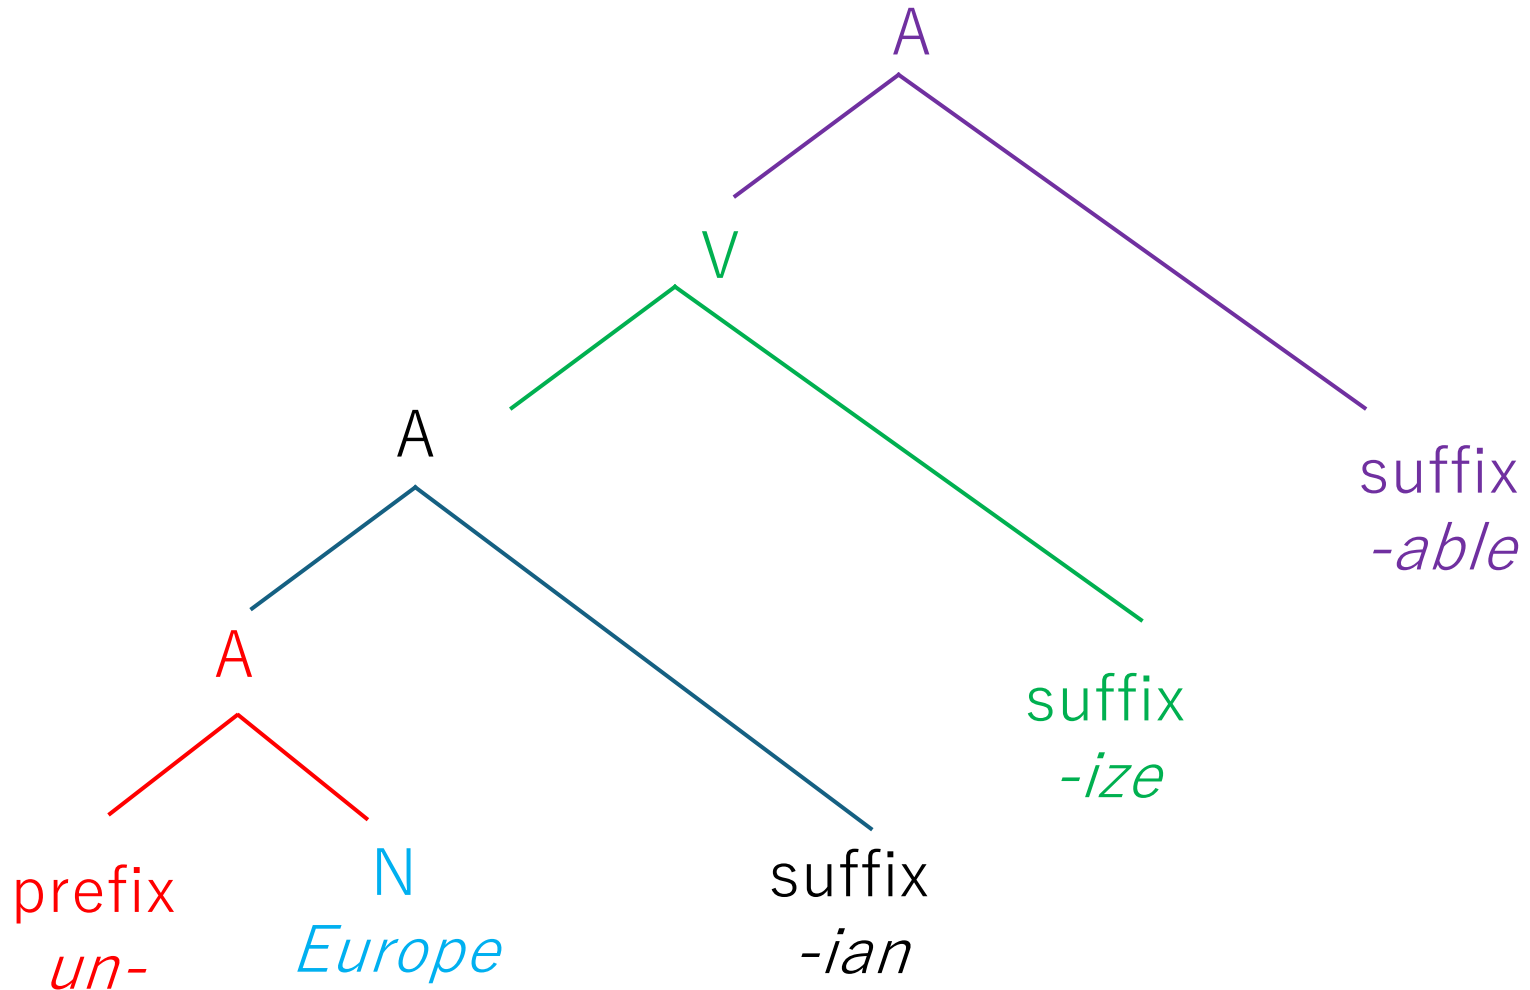

Quiz 10: Tree diagram for the word “unEuropeanizable”

Europe → *Europe-ian* → *Europe-ian-ize* → *Europe-ian-iz-able*

Quiz 10: Tree diagram for the word “**unEuropeanizable**”

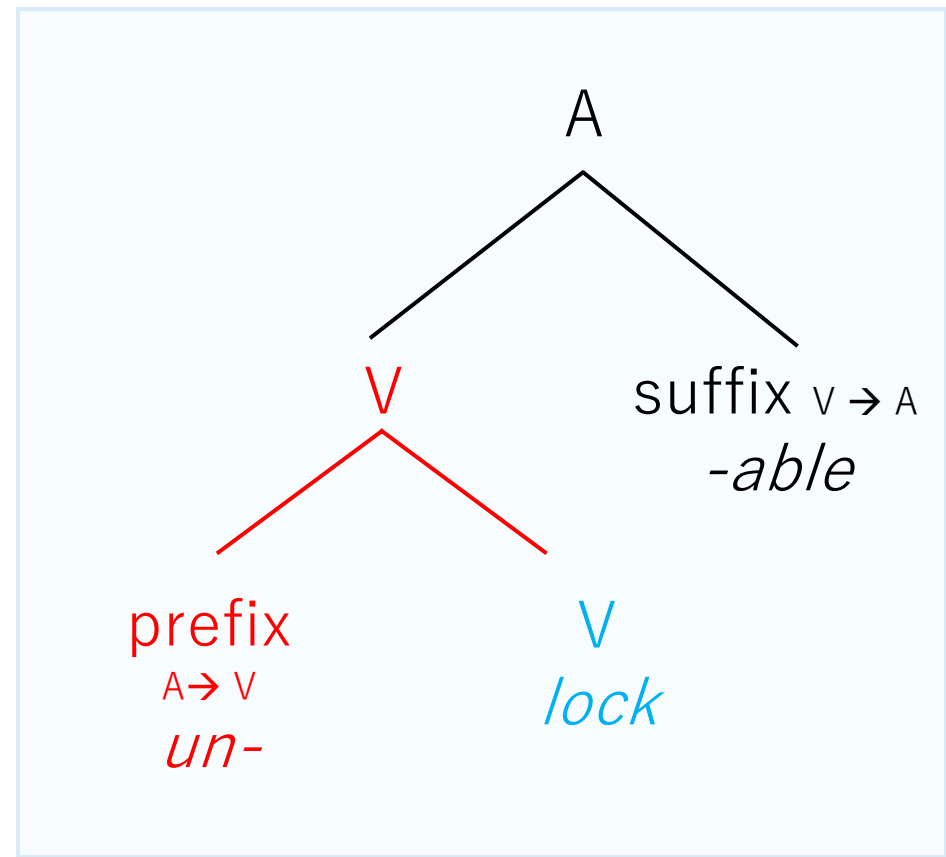

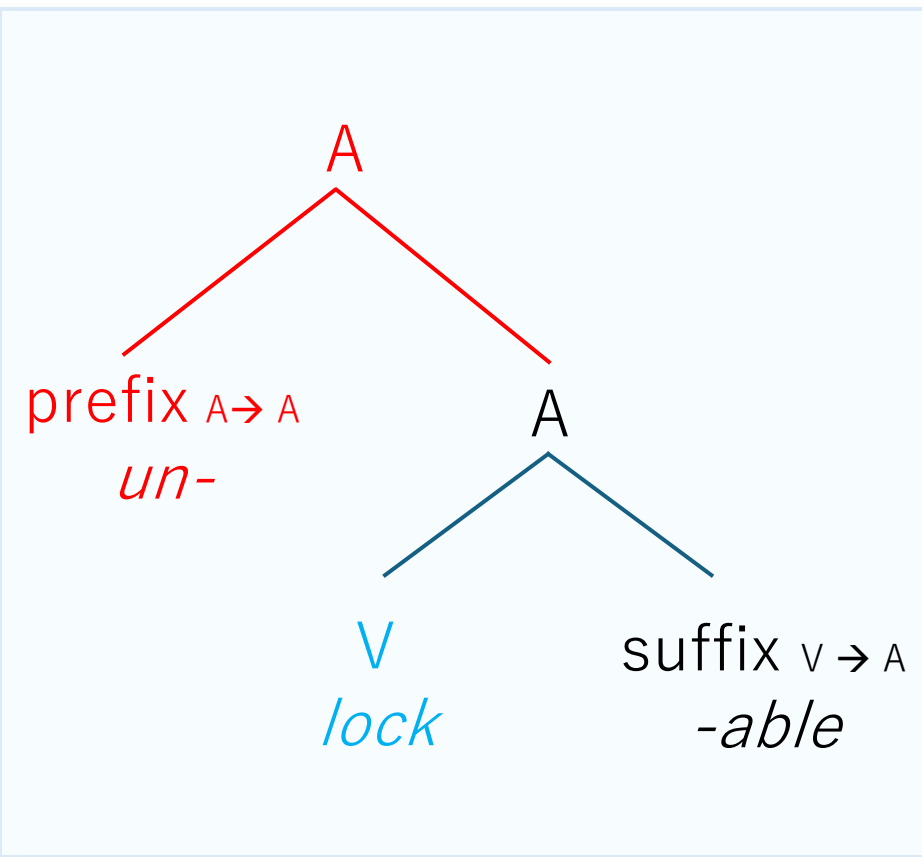

What's wrong with this analysis?

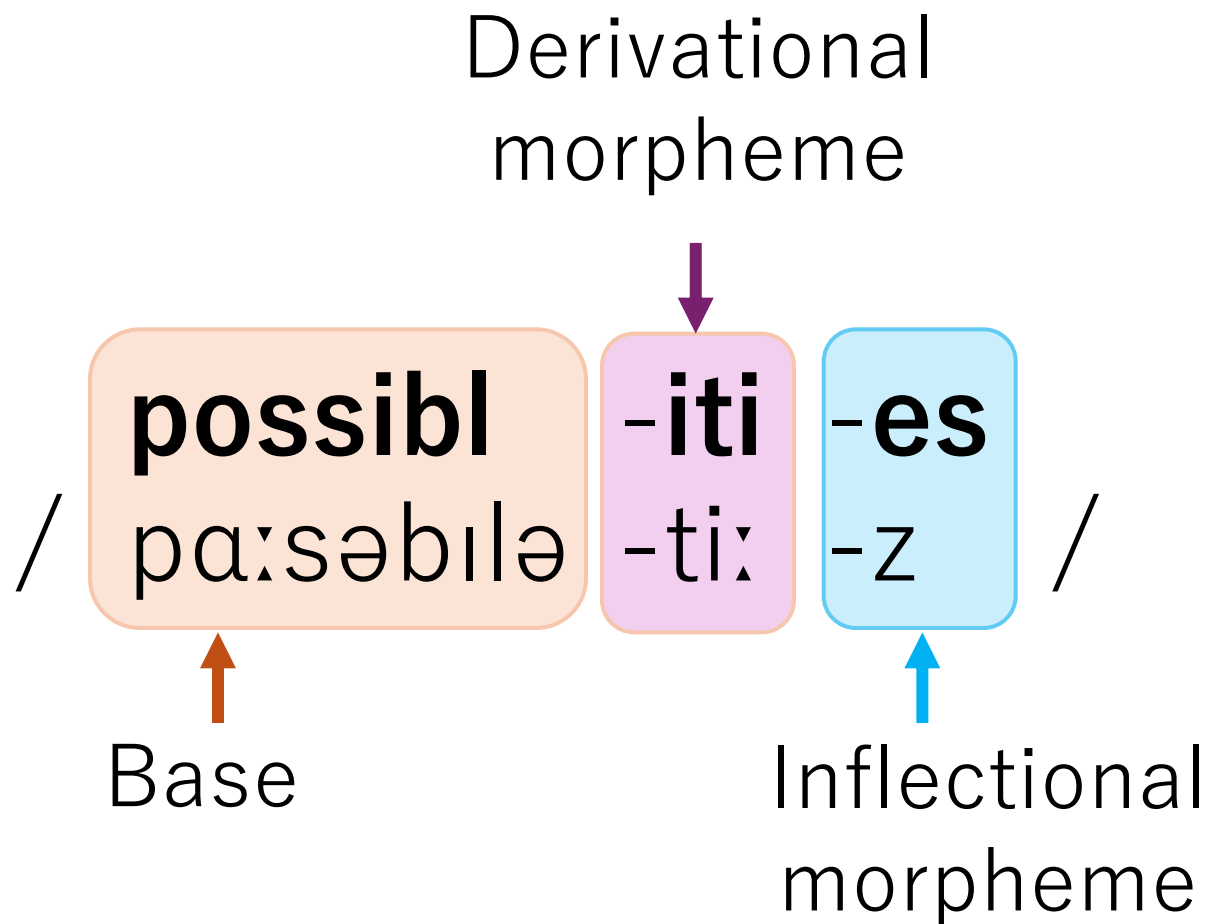

Ambiguity

Quiz 12

Quiz 11: Tree diagram for the word “**unlockable**”

Interim summary

Bracketing Paradoxes (Advanced Topic)

Bracketing Paradoxes

Definition

A word shows a bracketing paradox, iff it appears to show two distinct constituent structures.

Example

(1) twenty-first

- a. [twenty- [fir -st]] Morpho-Phonology
b. [[twenty- one] -th] Semantics

It doesn't mean we have twenty sets of different *first*'s!

Bracketing Paradoxes

Other examples

A bracketing paradox is observed in a context where a prefix is attached before a suffix.

(1) hydroelectricity

- a. [hydro- [electric -ity]]
b. [[hydro- electric] -ity]

(2) cross-sectional

- a. [cross- [section -al]]
b. [[cross- section] -al]

(3) four-legged

- a. [four- [leg -ed]]
b. [[four- leg] -ed]

Quiz 13

Bracketing Paradoxes

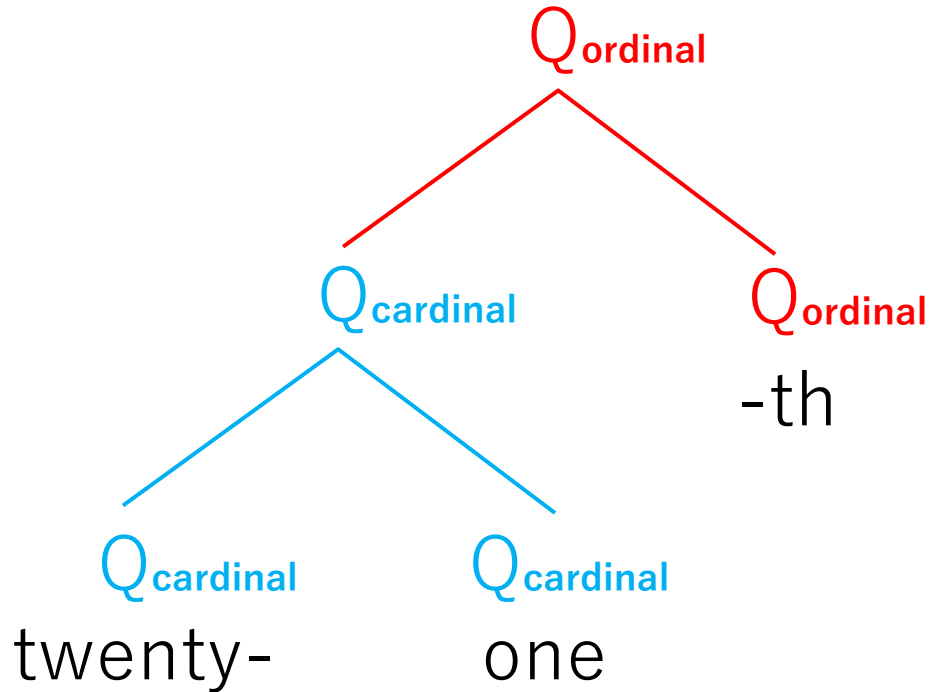

Propose an analysis!

Draw a tree diagram for the following example:

twenty-first

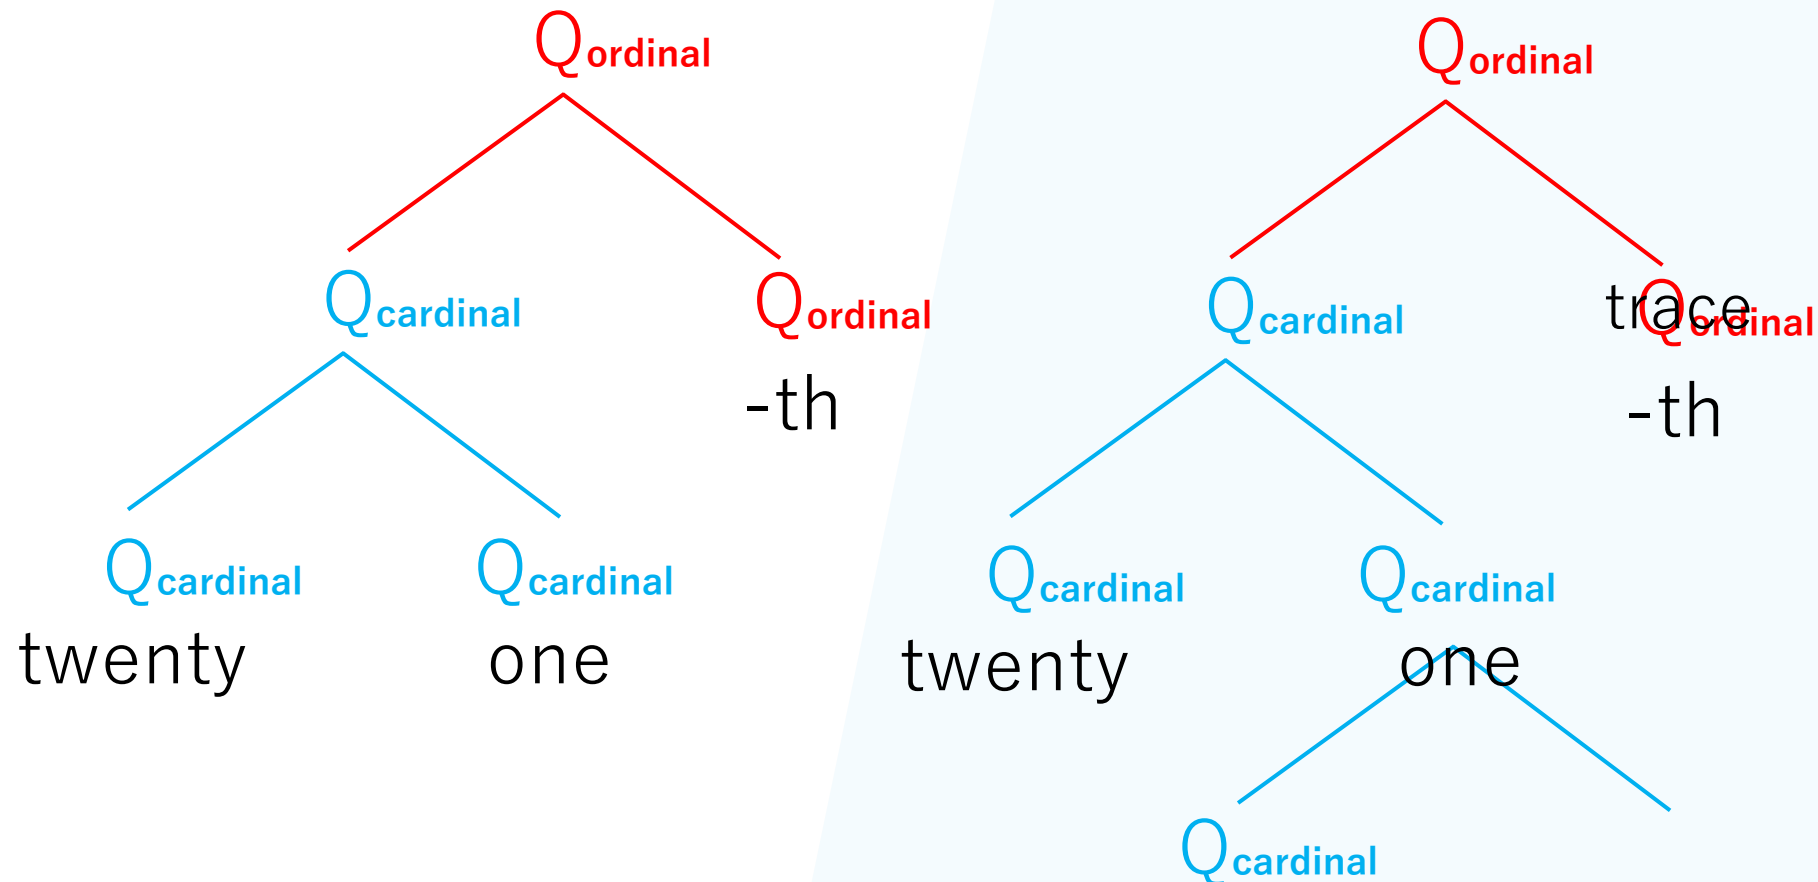

Bracketing Paradoxes

Propose an analysis!

Derivational account for bracketing paradoxes

Bracketing Paradoxes

Derivational account for bracketing paradoxes

Bracketing Paradoxes

Propose an analysis!

Draw a tree diagram for the following example:

John came.

Bracketing Paradoxes

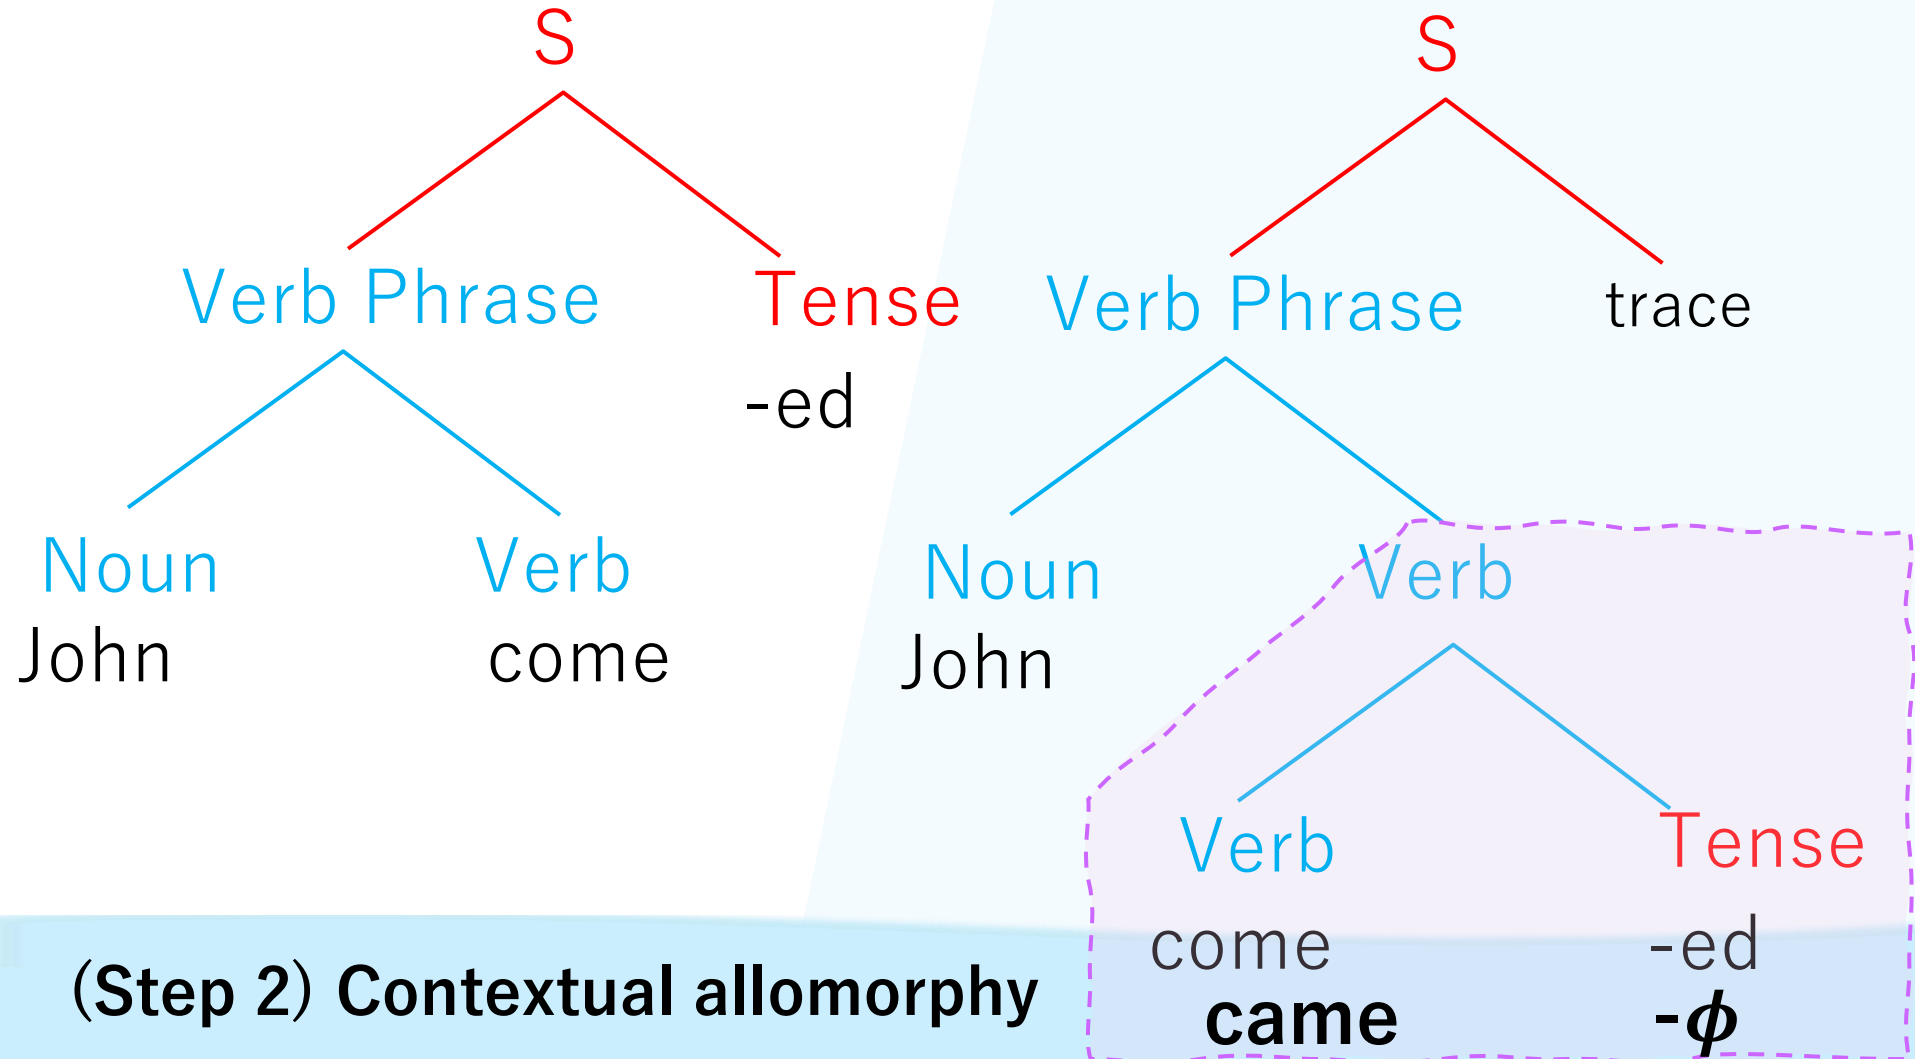

Derivational account for bracketing paradoxes

(Step 1) Morphological Lowering

Bracketing Paradoxes

Derivational account for bracketing paradoxes

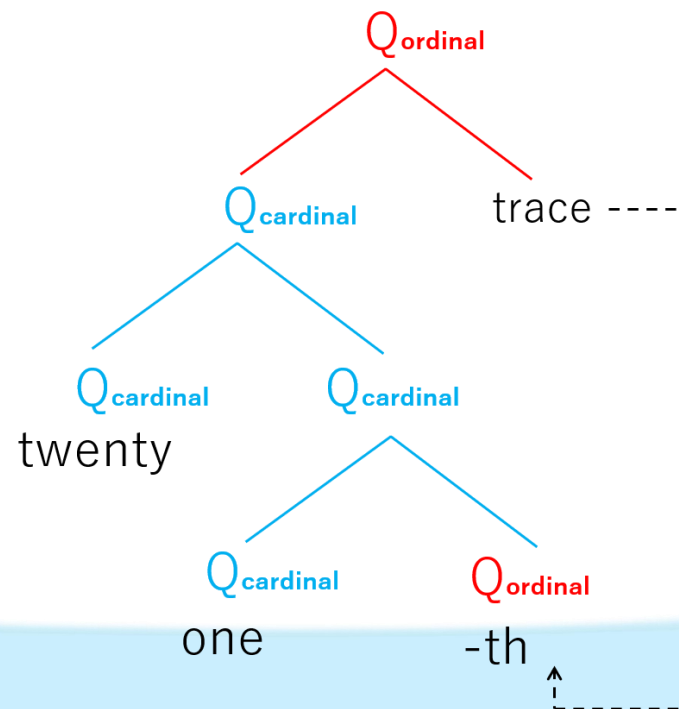

Dynamic view of a word/sentence structure

A basic structure is made,
before a morphological/phonological adjustment.

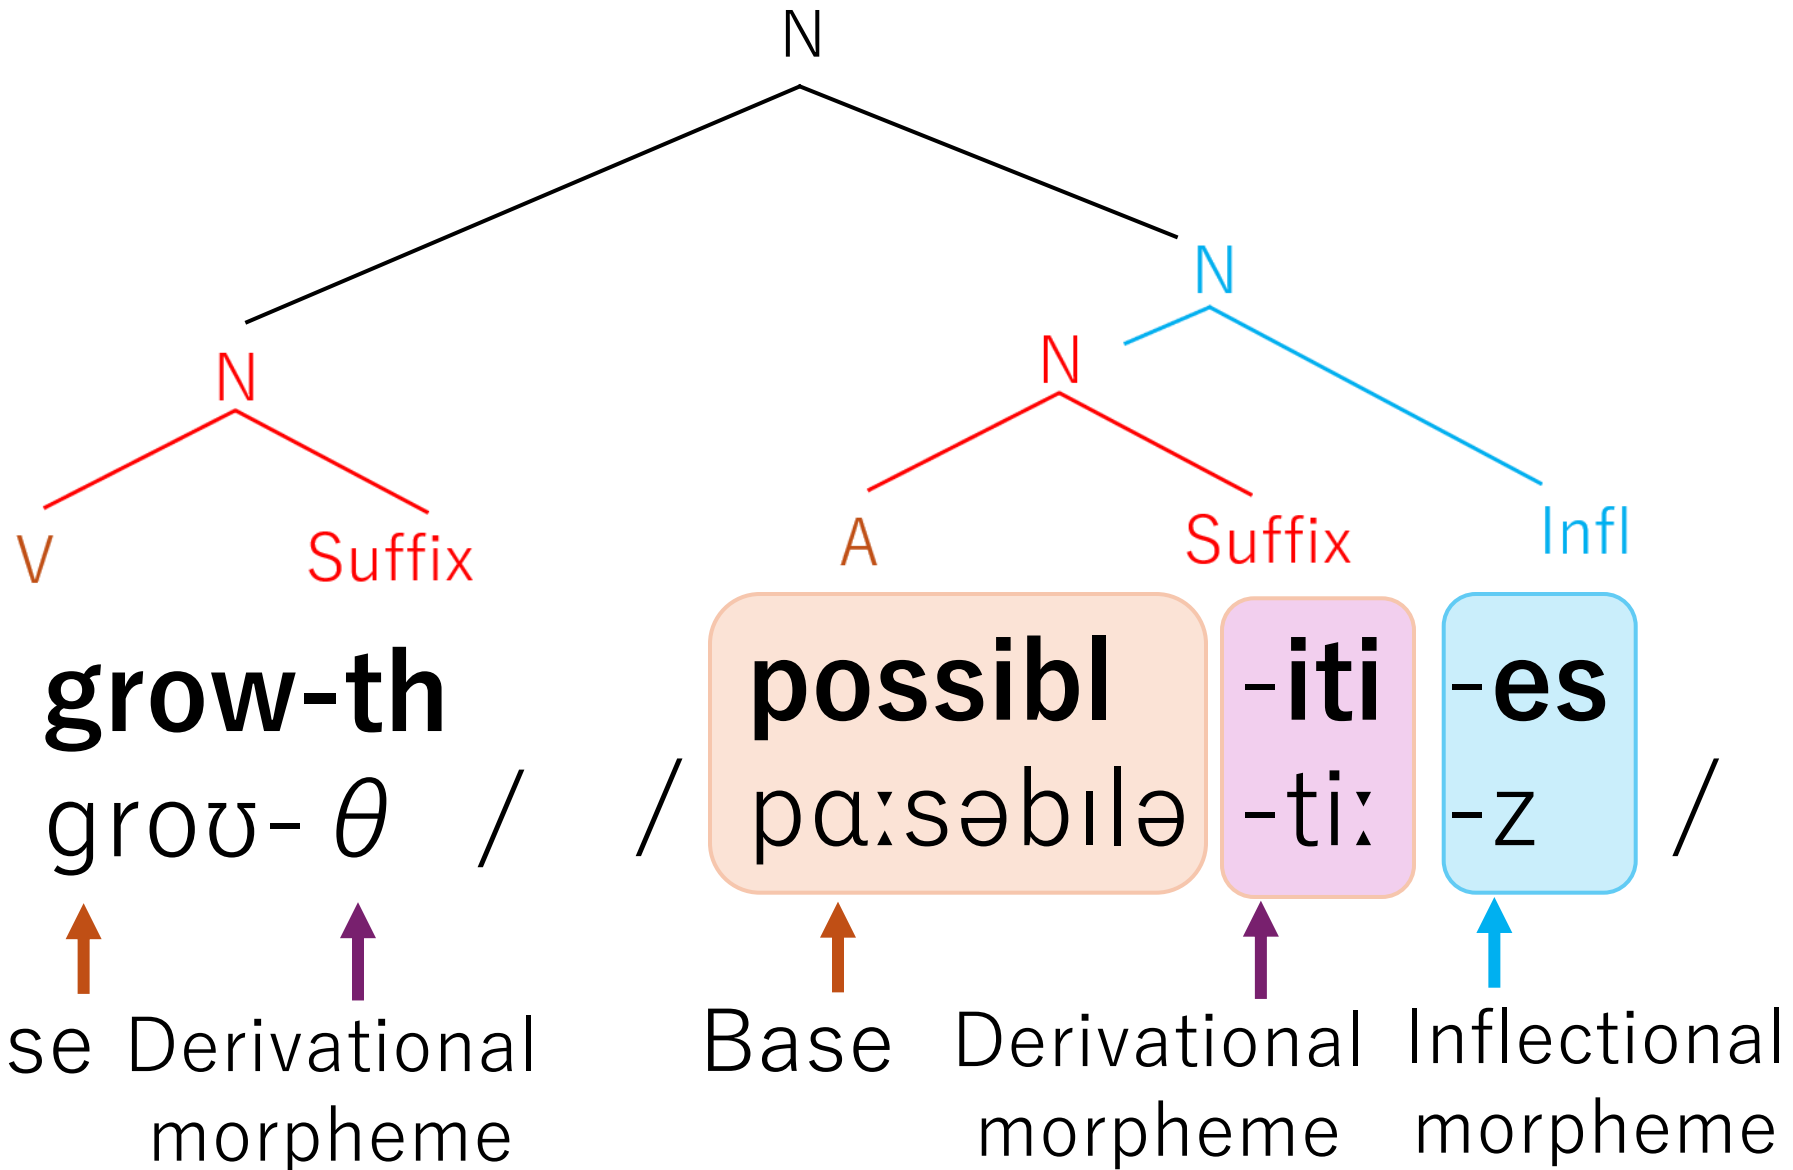

Morphological lowering

A head morphologically lowers
to another head,
iff an upper head moves down
to attached to a lower head.

Compounds

What's the rule?

- (3) a.* someonecut
b.* presidentshake
c.* cultprip rint

- (1) a. haircut
b. handshake
c. footprint

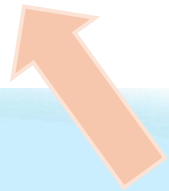

- (2) a. Someone cuts hair.
b. Presidents shake hands.
c. The culprit printed his foot on the ground.

Compounds

From a sentence to a word

- (5) a. water**fall**
b. heart**ache**
c. sun**rise**

OK

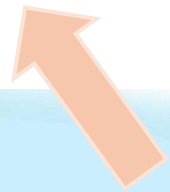

- (4) a. Water **falls.**
b. The heart **aches.**
c. The sun **rises** .

Compounds

From a sentence to a word

- (5) a. water**fall**
b. heart**ache**
c. sun**rise**

- (7) a. **free**fall
b. **fast**-talk
c. **high**-rise

OK

OK

- (6) a. Water **falls** **free (freely).**
b. A fraud **talks** **fast.**
c. A building **rises** **high.**

Compounds

What's the rule?

(1) a. haircut

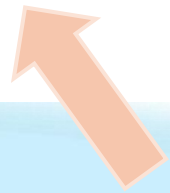

b. handshake

c. footprint

(8) a.* frequentcut

b.* firmshake

c.* recentprint

OK

*

(9) a. Someone cuts hair frequently.

b. Presidents shake hands firmly.

c. The culprit printed his foot recently
on the ground

Quiz 14

Compounds: what's the rule?

- (1) a. haircut
b. handshake
c. footprint

- (2) a. Someone cuts
b. Presidents shake
c. The culprit printed

- (5) a. waterfall
b. heartache
c. sunrise

- (6) a. Water falls
b. A fraud talks
c. A building rises

- (1) a. haircut
b. handshake
c. footprint

- (9) a. Someone cuts
b. Presidents shake
c. The culprit printed

- (3) a.* someonecut
b.* presidentshake
c.* cultprintrint
- hair.
hands.
his foot on the ground.

- (7) a. freefall
b. fast-talk
c. high-rise

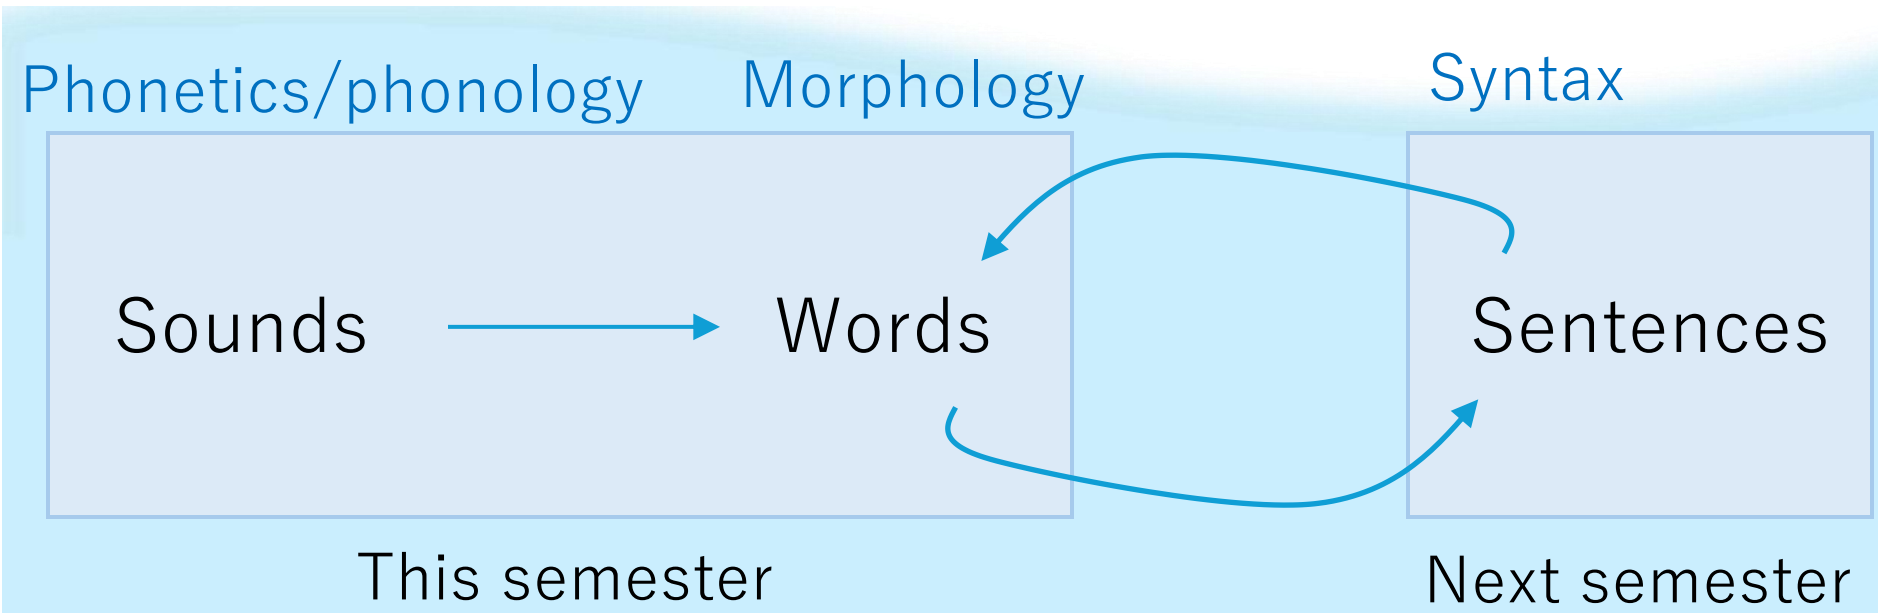

- free (freely).
fast.
high.

- (8) a.* frequentcut
b.* firmshake
c.* rencentrprint
- hair frequently.
hands firmly.
his foot recently on the ground.

Compounds

Case 2: Intransitive verbs

Compounds

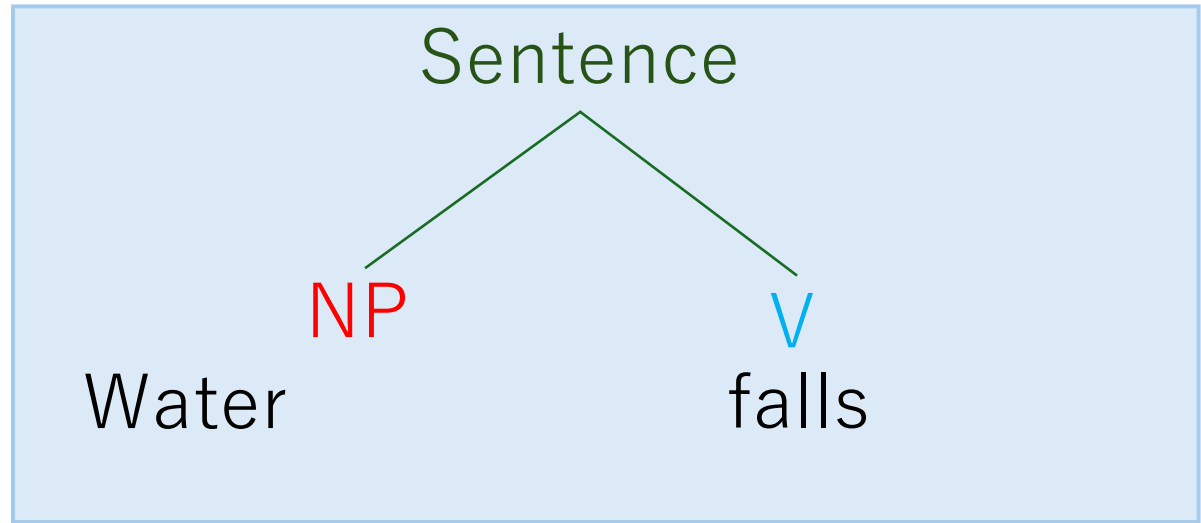

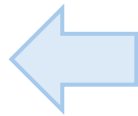

Case 2: Intransitive verbs

Compounds

Case 2: Intransitive verbs

water-fall

Generalization

First sister principle:

All verbal compounds are formed by incorporation of a word in first sister position of the verb (Roeper and Siegel 1978:208)
